

RECYCLED WOOD SCULPTURES AT THE MARKETS

Carrara Markets recently hosted world renowned recycler and artist from Copenhagen Denmark, Thomas Dambo
www.thomasdambo.com

Thomas and his Danish team created 3 spectacular sculptures at the markets all completely made from recycled scrap wood including old pallets, fencing and timber scraps gathered from the local area. Thomas gets inspiration from unwanted material and uses it as a creative recyclable source.

Piles of unwanted scrap wood were brought to life to form 3 large-scale installations each depicting an iconic Australian animal. Each sculpture is interactive, so you can step inside each one for a fantastic photo opportunity!
